ABOUT ME

After spending more than 4 years as an architect, I am excited to transition to UX/UI design. I have always been passionate about the design process and am eager to explore this new field.

As an architect, I honed my skills in problem-solving, spatial awareness, and visual communication. I am confident that these skills will translate well to UX/UI design, and I am eager to continue learning and growing in this industry. I am dedicated, hardworking, and committed to delivering the best possible design solutions for my clients. I look forward to using my creativity and passion for design to create intuitive and user-centered experiences.

EDUCATION

B.Arch

Anna university

2013-2018

UXUI Design Bootcamp

Designboat

2022

- Worked on a mock fitness application during the boot camp
- Conducted a thorough analysis of the problem statement and collaborated with the team to gain a deeper understanding of the issue through **research**
- Understood the problem by creating **personas, empathy maps, and user journey maps**, which helped to better understand and empathize with the needs of the users
- Designed and developed the solution utilizing **user flow** and **information architecture** methodologies
- Developed the design by starting with paper wireframes, then creating **digital wireframes** using Figma.
- Implemented the solution in design using **Figma**
- Iterated on the design after incorporating feedback from **user testing**.
- Created a **prototype** of the mock application, complete with **animations**, to demonstrate its functionality
